

#####

OC 3 IMAGE CRUSHER - Website Speed

#####

Backup your OpenCart installation, just to be safe.

The Opencart 3 image crusher is a module that compresses the jpegs and Png's previously uploaded to your site and also all future jpegs and png added via the image manager.

You have the option to set the level of compression and also the ability to turn it off when it is not needed.

#####

DEMO

#####

Admin:

<https://www.madadinfosoft.com/ocextension/image-crusher/admin>

USERNAME: demo

PASSWORD: demo

crush existing images

- enter catalog/demo and click crush images and watch as the images are compressed.

crush new images

- Upload a jpeg from your computer and see how much it is optimised.

-- Go to Catalog Product Add/Edit Product click on Image tab.

#####

FAQ

#####

Q: Can Image Crusher compress images that are live on my site now?

A: Yes, you enter a folder name and the Module will scan all the images in this directory and all subdirectories for images. It will then compress all of the jpegs it finds.

Q: Will this work for all image types?

A: This version of Image Crusher is for JPEG's and PNG's only.

Q: What happens the original file?

A: The original file stays on your computer, untouched.

Q: Can I set the compression level

A: Yes, this can be set from 1-10 in the admin

Q: What compression level do you re-command?

A: Level 7 is a good choice for sharp images that are small in size.

Q: What if I upload another file type?

A: If you upload any other image type it will simply be processed as normal and the Image Crusher will not touch it.

Q: Can I turn it off in the Admin?

A: Yes, you can set the Image Crusher to off if it is not needed.

Q: What is the maximum file size?

A: The default Opencart value is 300kb but you can change this yourself.

Q: What if the image quality is poor?

A: If you select Level 10 compression your images will still be good as the module applies a threshold in the background to ensure the image quality does not come out too bad.

Q: Will this work with multi image uploader?

A: Image Crusher has been tested against Multi Image Uploader and both modules work perfectly side by side. This is because Multi Image Uploader bypasses the image manager and uploads straight from your computer.

Therefore, if you upload multiple images they will not get any optimisation. You need to upload one by one through the image manager to get the goodness of Image Crusher.

#####

INSTALLATION Vqmod

#####

Ensure vqmod is installed (Download here if you don't already have it:
<https://github.com/vqmod/vqmod/releases>) Take the Opencart version.

Download the Image Crusher package.

Upload the files to the root of you opencart store.

#####

INSTALLATION OCMOD

#####

- Download the Image Crusher package. Find the OCMOD folder there is image-crusher.ocmod.zip
- Go to admin Extension > Installer
- Select image-crusher.ocmod.zip from OCMOD folder
- After Installation succesfully than Refresh Modification.

Go to your admin and Extensions > Modules.

You should see Image Crusher in the list. Click Install.

Click Edit.

By default the image crusher will be turned on.

Select the level of compression you want. Higher compression = smaller file size!

Click Save.

All images uploaded through the image manager will now be compressed automatically. You will receive a popup that shows you the how much the Image Crusher reduced your file size by.

You can also compress all the images that are live on your site. Just make sure you clear your image cache afterwards.

#####

UPGRADING

#####

If you are upgrading from a previous version of Image Crusher, simply copy over the existing files on your server and reload your admin.

#####

PROBLEM SOLVING

#####

Ensure the module has permissions. Go to System>Users>User Groups>Top Administrator.

Ensure module/image_crusher is checked for access permission and modify permission.

Delete your vqmod cache files

Refresh Modification From Admin Extension > Modification

Clear your site cache.

#####

SUPPORT

#####

We Provide Free Installation to your opencart 3 store, If you are unable to install than you can contact me with your Order ID.

If you require and assistance drop me a line at chirag9151@gmail.com

Image Crusher

Home - Module - Image Crusher

Edit Image Crusher

This is the module to configure the jpeg image crusher.

New Images via Image Manager

This section configures the settings for all future images uploaded via the image manager. Once turned on, all jpeg images uploaded through the image manager interface will be automatically optimised. Any other image type will be ignored.

SWITCH ON/OFF

Turn the jpeg compressor on or off by selecting one of radio buttons below.

On Off

COMPRESSION LEVEL

Select the level of compression you want to apply to your images. The higher the compression level, the smaller the file size.

Level 7

Crush Existing Images

This feature allows you to compress images that you have previously uploaded to the image folder on your site. You simply enter the path of a folder and click Crush. The Crusher will then scan this folder and any subfolders and compress all of the jpeg images that it contains.

BE CAREFUL!

Only use this feature on images you have previously uploaded to your site. This feature will scan the folder and any subfolders and compress all of the jpeg images that it contains. It will not affect any other image types.

COMPRESSION LEVEL

Select the level of compression you want to apply to your images. The higher the compression level, the smaller the file size.

that it contains.

BE CAREFUL!
This is a very powerful feature and should be used with care. Once the images have been compressed they will not be returned. You should only use this on one folder to test if you are happy with the results before crushing all of the images on your site.

COMPRESSION LEVEL
Select the level of compression you want to apply to your images. The higher the compression level, the smaller the file size.

Level 7

Enter the path of a folder inside the image directory e.g. catalog/demo
